Logo Guidelines

leverist.de

leverist.de

leverist.de

The leverist logo is based upon the Roobert font family and best used in its full color version for optimal branding purposes. Please only use the logo on light and certain non-colored backgrounds.

The inverted version of the leverist.de logo can be used on e. g. images and colored backgrounds. Please do not alter the logo in any way.

All logo files can be found in RGB (Web) as well as in CMYK as well as Pantone (Coated and Uncoated) for Print Production. If time and budget allow for it, please always opt for printing techniques supporting Pantone color values.
